Investment Philosophy

Protecting Capital - DSD Mechanism

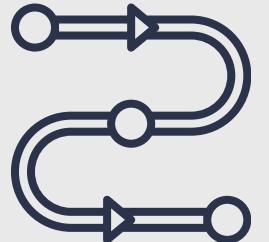

DIVERSIFICATION

Three important risks : Governance, Technology and Business cycle - can be reduced only by Diversification. We invest across market cap, sectors, and companies to reduce company/sector specific risk.

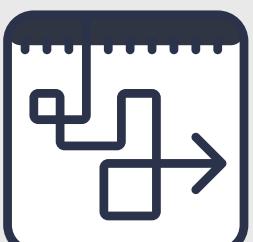

STAGGERED APPROACH

We build the portfolio over a period of time. We do not follow Model portfolio approach.

DISCIPLINED EXIT STRATEGY

We have a disciplined Exit strategy. We sell/reduce due to rebalancing of the portfolio, change in growth assumption of our portfolio company, expensive valuations.

Investment Philosophy

Creating Wealth - 3M Approach

01

Market Size

Market size determines size of opportunity. We prefer companies which are targeting large market size to generate exponential returns.

02

Market Share

We buy the companies which are leaders in their sector as they are best positioned to navigate upturn and downturn of the economy.

03

Margin Of Safety

Price is what you pay. Value is what you get. We buy the companies which are available at reasonable valuations.

We **exit** when....

There is a need to rebalancing weights for risk management purposes

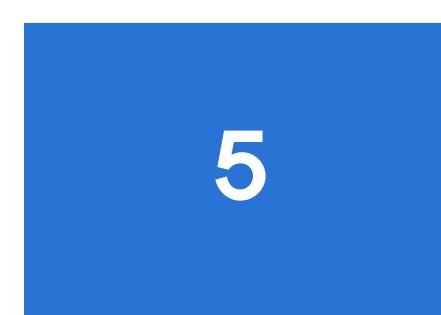

A company no longer meets our buy/hold criteria

A company no longer meets our valuations criteria

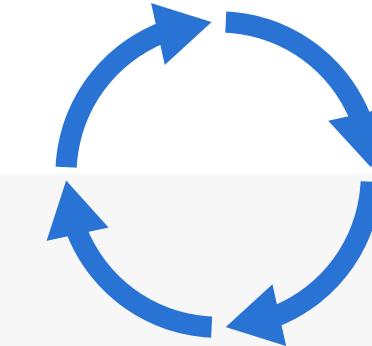

There is no longer a durable double digit return expectation for a company's stock

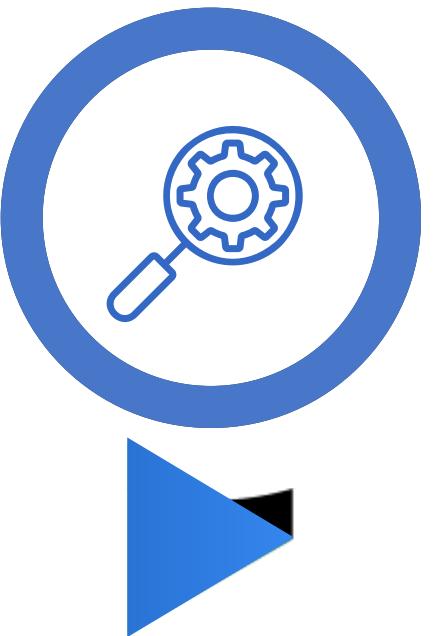

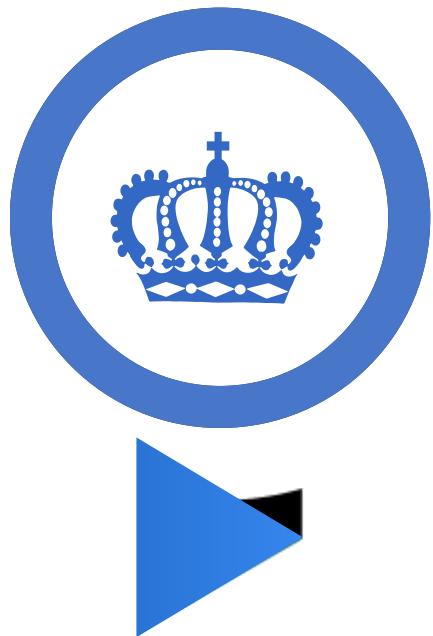

There is a more compelling investment opportunity to fund

Agility - Exit Strategy

The only constant is change.
The average lifespan of a company listed on the S & P 500 has reduced from 90 years in 1935 to 18 years, as per a McKinsey report. We are agile, and active, never letting our guard down.
