## About Our Director

He brings 31 years of experience in the Indian capital markets. He was formerly a Fund Manager at Reliance Capital Asset Management (US\$20bn) for over four years, where the Reliance Emergent India Fund, a US\$100m offshore fund, outperformed benchmark indices by 35% since inception, and he played an instrumental role in setting up the macroeconomic research desk. Earlier, he served as Executive Director at UBS Securities India for 4 years as India Account Manager for large FIIs, advising PMs on country, sector, and stock allocation. He also spent a decade as Senior Vice President of Equity Sales at Motilal Oswal Securities, where he was a key contributor to building the institutional equity broking business, systems, and processes.

**Represented Reliance AMC on international platforms and panel discussion on Emerging Markets and Indian Equity Market**

**Addressed investors' meet and the private banking teams of large banks in Middle East, Asia, London, Europe and in India**

**At UBS, was voted as the "Best Equity Sales Person-Mega Funds category, Asia Money 2006"**

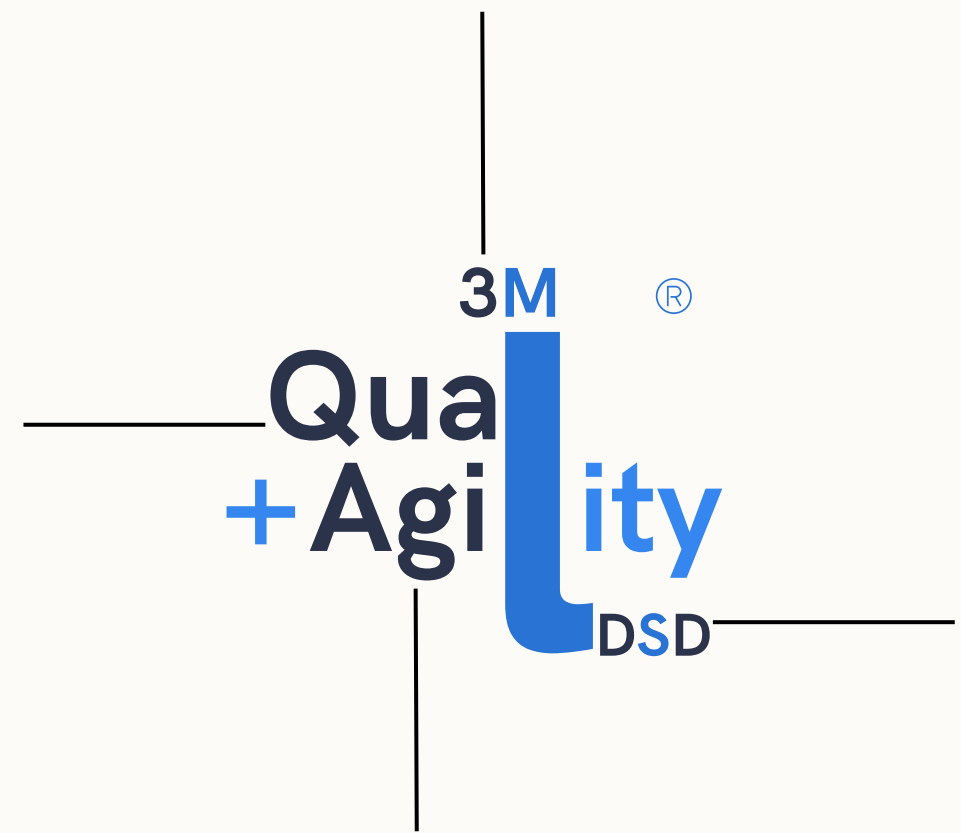

**Won several awards at Motilal Oswal for consistently contributing to Institutional Equity Sales**

# AAA Investment Philosophy

**Market size**  
Large and expanding opportunity. **1**

**Market Share**  
Structural ability to gain dominance. **2**

**Margin of Safety**  
Valuation and balance sheet discipline. **3**

**Diversification**  
To reduce company/sector specific risk. **1**

**Sizing Discipline**  
Dynamic position sizing based on conviction, and risk. **2**

**Disciplined Exit**  
Driven by rebalancing, and growth/valuation concerns. **3**

The philosophy is designed to endure across market cycles, with decisions guided by long term conviction rather than near term market signals

 **13 Such Forensics Parameters**

 **8 Such Longevity Parameters**

 **It's not about chasing fast growth; it's about owning high quality businesses that compound sustainably across cycles.**

# Agility Guides Our Exit Strategy

## We Exit When

- 1 There is a need to rebalance weights for risk management purposes
- 2 A company no longer meets our buy/hold criteria
- 3 A company no longer meets our valuation criteria
- 4 There is no longer a durable double digit return expectation for a company's stock
- 5 There is a more compelling investment opportunity to fund

# 18 years

**The average life span of company listed in the S&P 500**

The only constant is change. The average lifespan of a company listed on the S&P 500 has fallen from 90 years in 1935 to just 18 years today, highlighting how quickly leadership erodes without sustained competitiveness.

**We stay agile and active, continuously reassessing fundamentals, risks, and relevance, never letting our guard down.**

# Navigating this crisis

---

## **The Oil Shock: What It Means For India**

- A temporary oil shock is fundamentally different from a structural one. Unlike earlier stress episodes, India is entering this phase with significantly stronger macro shock absorbers.
- Public capex has scaled up meaningfully at both the Centre and state levels, reinforcing domestic growth momentum.
- India has a far greater ability to absorb short term commodity volatility without allowing it to evolve into a broader macro disruption something that differentiates the current phase from past crises.

## **What if the oil prices remains high for a longer period**

- In a stress scenario where oil sustains at USD 100/bbl through FY27, CAD could expand to ~2.3% of GDP which would still be within a manageable CAD range.

## **Will FII selling continue**

- P/E multiples is now approaching multi year support zones, levels that have historically marked important inflection points for India's relative outperformance.

## **Valuation Linked Return Framework – What History Tells Us**

- The message from history is clear: current valuations offer a favourable entry point.

# Navigating this crisis

---

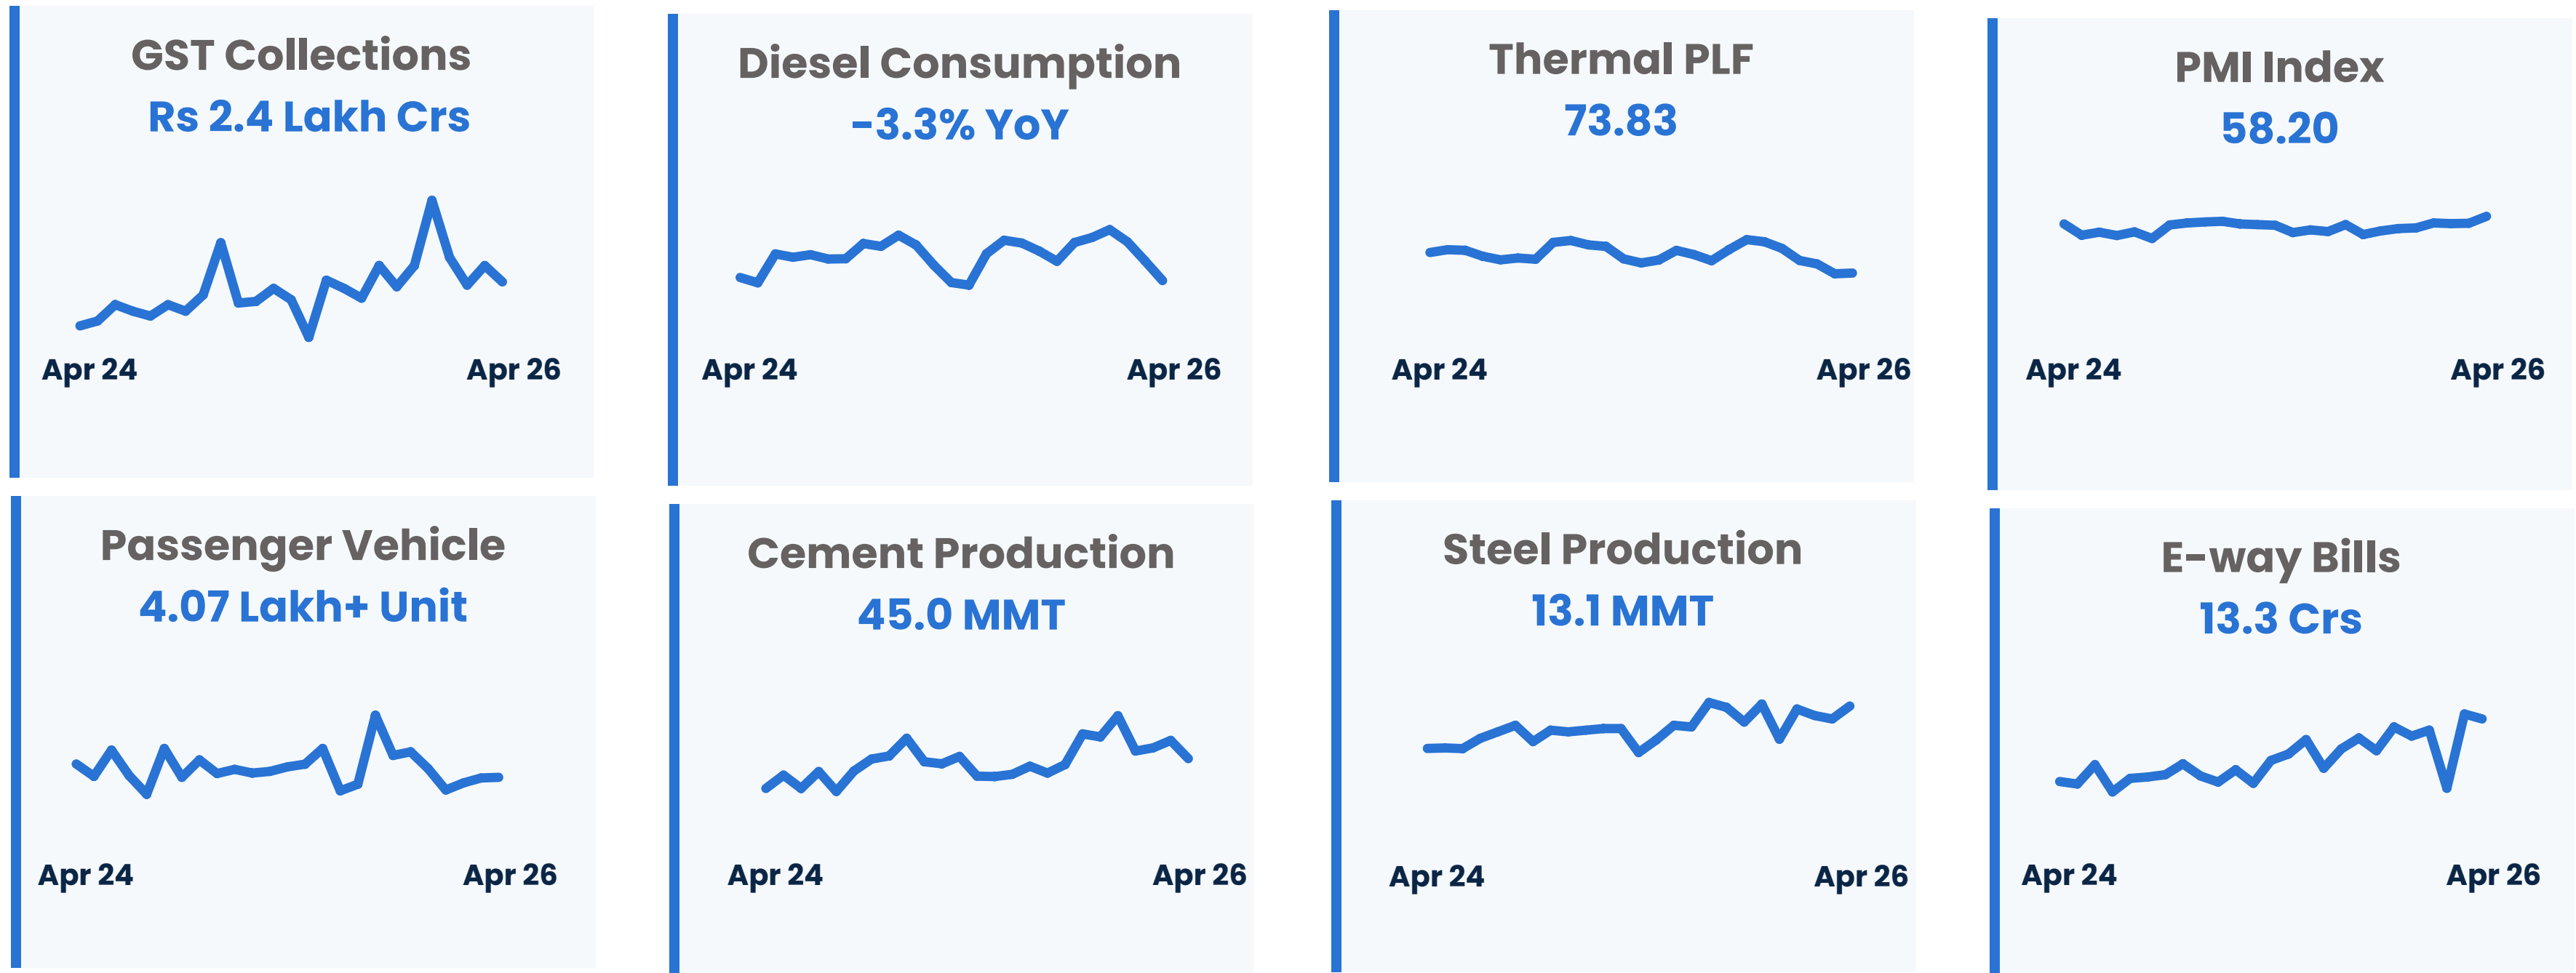

## How We Are Navigating This Phase

- Emphasis on resilience based on our 3M (Market Size, Market Share, Margin of Safety) approach.
- Focus on businesses which enjoys market leadership, strong balance sheet and robust cash flows which are better positioned to navigate external shocks.
- Our approach remains anchored in what we describe as QuAgile investing: combining quality with agility.

## Sectoral Preferences

- **Zero exposure to Oil marketing companies (OMCs) and aviation are among the most impacted sectors in a rising crude price scenario.**
- Positive on Automobiles and auto ancillaries, Consumption oriented businesses, Banking and financials, Capital goods and Select Hospitals.
